Try it at Home Series: Color-Changing Flower

What you'll need:
- Clear cups
- Water
- White flowers
- Liquid food coloring in a variety of colors
- Paper to record changes

Directions:
- Trim down the stems of the flower so they fit your cups or glasses.
- Add water to each cup.
- Then put about 10-15 drops of food coloring in the water and stir around a bit.
- Add at least one carnation to each glass of colored water.
- Check in on the flowers every couple of hours and observe any changes.

NOTE: The color change is slow, as the flowers take some time to drink the food-coloring water. It is recommended to do this experiment in the morning and note changes throughout the day and possibly into the next day to see more vibrant colors.
- Test with a variety of white flowers to see if flower type effects the results.
